EDUCATION

📍 **BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY**

Innovative College of Science & Technology

Malitbog, Bongabong, Oriental Mindoro 5211

2021 - 2025

ACADEMIC AWARDS

2023 - 2024

🏆 **Master in Web Software Tools**

🏆 **Master in IT Elective 1 Mobile Application**

🏆 **Master in Application Development and Emerging Technologies**

🏆 **Master in Web Portfolio**

🏆 **Master in Information Assurance and Security 2**

OBJECTIVES

To leverage my expertise in HTML, CSS, JavaScript, React, and responsive design as a front-end developer, while also expanding my impact across the broader IT field. I aim to contribute to the development of intuitive, efficient, and scalable solutions—ranging from user interfaces to system integration and application support. My goal is to thrive in a collaborative team environment, drive innovation, and continuously grow through hands-on projects, cross-functional initiatives, and ongoing learning in both software development and IT infrastructure.

PROJECTS

2022 - 2023

LIBRARY MANAGEMENT SYSTEM

Technologies: HTML, CSS, JavaScript
Description: Developed a library management system with inventory tracking, user checkouts, borrowing, purchasing, and admin tools for managing books and return dates.

2023

MINI GROCERY STORE SYSTEM

Technologies: HTML, CSS, PHP
Description: Developed a web-based Mini Grocery Store System with features for browsing products, adding items to cart, and completing orders through a standard checkout process.

2024

ICST MOBILE GRADING SYSTEM

Technologies: HTML, CSS, JavaScript, Java
Description: Created the ICST Mobile Grading System, featuring a Java-based Android app for grade input and reports, and a web backend for admin data management.

TECHNICAL SKILLS

HTML, CSS, JavaScript

React.js

Familiar with Firebase (Realtime Database, Authentication, Storage, Hosting)

Basic knowledge of MySQL (database management)

Git & GitHub

Familiar with npm (package usage and scripts)

Solid understanding in basic computer operations and troubleshooting

OJT INTERN

2025

RECRUITMENT SYSTEM

MWEEB INFORMATION TECHNOLOGY INC.

During my OJT, I had the opportunity to work on a real-world project by contributing to the development of a Recruitment System. This hands-on experience allowed me to apply my front-end development skills using technologies such as HTML, CSS, JavaScript, and React, while also gaining exposure to back-end logic, database management, and system workflows within the broader IT landscape.

Throughout the project, I collaborated with experienced developers and mentors who provided valuable guidance and feedback, enhancing both my technical proficiency and professional growth. This experience not only deepened my understanding of software development processes but also introduced me to essential practices in system design, deployment, and cross-functional teamwork within the IT field.
